

FCL Components Wireless module

Bluetooth® low energy (Bluetooth v5.0) enabled

Beacon Unit (with Sensor)

FWM8BLZ07A-109099 Datasheet

Ver. 2

Feb 1, 2024

The above Product is designed, developed and manufactured as contemplated for general use, including without limitation, general office use, personal use, household use, and ordinary industrial use, but is not designed, developed and manufactured as contemplated (1)for use accompanying fatal risks or dangers that, unless extremely high safety is secured, could lead directly to death, personal injury, severe physical damage or other loss (i.e., nuclear reaction control in nuclear facility, aircraft flight control, air traffic control, mass transport control, medical life support system, missile launch control in weapon system), or (2)for use requiring extremely high reliability (i.e., submersible repeater and artificial satellite), hereinafter referred to as "High Safety Required Use". You shall not use this Product without securing the sufficient safety or reliability required for the High Safety Required Use. If you wish to use this Product for High Safety Required Use, please consult with our sales representatives in charge before such use.

1. Summary

This datasheet applies to the *Bluetooth*[®] low energy (Bluetooth v5.0) enabled Beacon Unit FWM8BLZ07A-109099.

2. Features

This product is Beacon Unit compliant with *Bluetooth* Specification Version 5.0, and is possible to communicate in the ISM (Industrial Scientific Medical) band.

This product is a unit with a Bluetooth Low Energy module and various sensors in our original housing. This product is powered by a coin cell battery and is equipped with a slide switch, push button, and LED indicator.

This product conforms to single mode of Bluetooth low energy technology, and mainly operates as broadcaster device and transmits sensor data acquired from various sensors.

The followings are the key features.

- *Bluetooth* Specification Version 5.0 (*Bluetooth* low energy Single mode) Compliant
- Dimension: 40.0mm x 31.0mm x 12.0mm
- Weight: 9.4g (without CR2450 coin-cell battery)
- Software Interface: FCL Components proprietary commands/events
- Hardware Interface: Push Button, Slide Switch
- Operating Temperature: -30 to +60 °C (without CR2450 coin-cell battery)
- Operating Humidity: +20 to +80 %RH (No dew condensation)
- It has the following sensors
 - Temperature, Humidity, barometric pressure
 - 3-axis acceleration
 - Illuminance
 - Sound level
- Power Supply: Coin-cell battery 3V (CR2450)

The functions are as follow:

- Transmission of advertising data (Beacon information)
- Acquisition and transmission of sensor data
- Operation mode change by handling a button
- Status display by LED indicator
- Changing of settings from central device (wireless)
- Function to notify battery voltage

The *Bluetooth*[®] word mark and logos are registered trademarks owned by *Bluetooth* SIG, Inc. and any use of such marks by FCL COMPONENTS LIMITED is under license.

Other third-party brands and names are the property of their respective owners.

3. Applicable Standard

- *Bluetooth* Specification Version 5.0
QDID: 124430
- FCC,ISED certification
FCC ID: SQK-7BLZ20
ISED ID: 337L-7BLZ20
- CE Marking
- ARIB STD-T66
Radio Act (Japan) Certification No. 007-AE0249
(Certificated by the combination of embedded module.)
- RoHS Compliant

4. Block Diagram

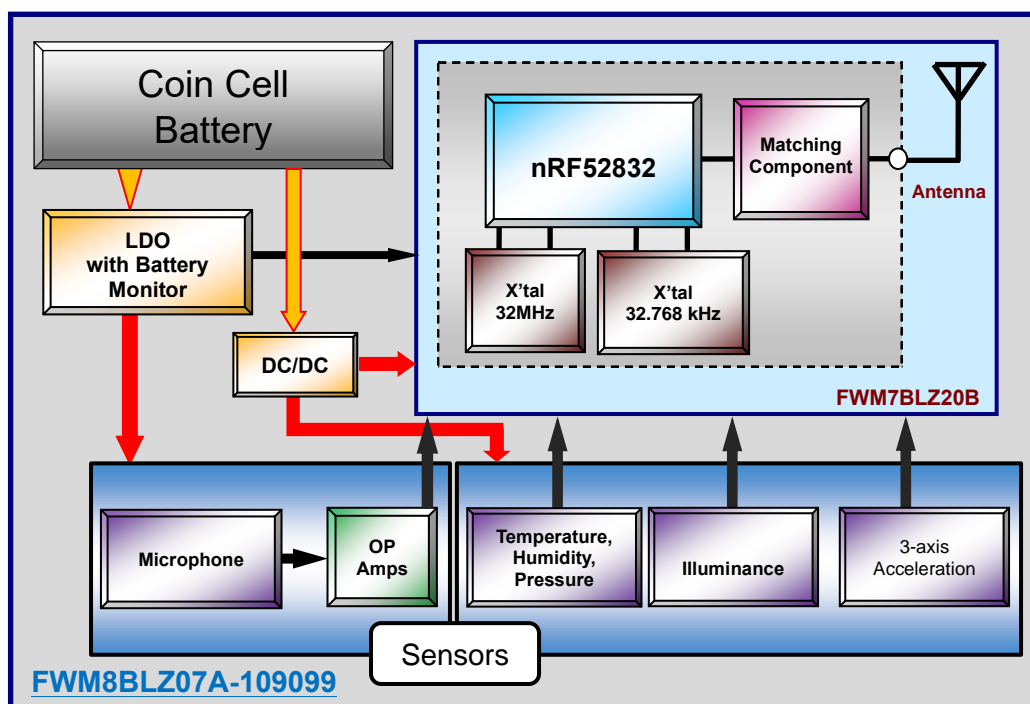

Figure 4-1: Block Diagram

5. Electrical Characteristics

5-1. General Features

Bluetooth Specification Version 5.0 Compliant

Carrier Frequency: 2400 MHz to 2483.5 MHz

Modulation: GFSK

Symbol Rate: 1 Msps, 2 Msps

Data Rate: 1 Mbps, 2 Mbps

Channel: 40 channels

Channel Spacing: 2 MHz

Output power: +4 dBm max

5-2. Absolute Maximum Rating

Items	Symbol	Min	Max	Unit
Supply voltage (VDD)	VDD	-0.3	5.5	V
Supply voltage (GND)	GND	-	0	V
Storage Temperature	Tstg	-30	+60	°C

5-3. Recommended Operating Condition

Items	Symbol	Min	Typ	Max	Unit
Operating Voltage	VDD	2.5	3.0	3.3	V
Operating Temperature	Ta	-30	25	+60	°C
Operating Humidity	Hopr	20	-	+80	%RH

*No dew condensation

5-4. General radio characteristics

Ta=25±2°C

Items	Condition	Min	Typ	Max	Unit
Operating frequencies	2MHz channel spacing	2400	-	2483.5	MHz
PLL programming resolution			1		MHz
Frequency deviation		±225	±250	±275	kHz

5-5. Transmitter Specifications

Ta=-30°C to 60°C

Items	Condition	Min	Typ	Max	Unit
Output power		-16		+4	dBm
Step size of RF power control			4		dB
RF power control range			+24		dB

5-6. Receiver sensitivity

Ta=-30°C to 60°C

Items	Condition	Min	Typ	Max	Unit
Maximum received signal strength	< 30.8% PER		0		dBm
Receiver sensitivity	Dirty transmitter < 30.8% PER		-94		dBm

5-7. Receiver specifications

Ta=25±2°C

Items	Condition	Min	Typ	Max	Unit
RX selectivity	C/I co-channel	-	10	21	dB
	1st ACS, C/I 1 MHz	-	1	15	dB
	2nd ACS, C/I 2 MHz	-	-25	-17	dB
	ACS, C/I (3+n) MHz offset [n = 0, 1, 2, . . .]	-	-51	-27	dB
	Image blocking level	-	-30	-9	dB
	Adjacent channel to image blocking level (±1 MHz)	-	-31	-15	dB
RX intermodulation	IMD performance, 3rd, 4th and 5th offset channel	-50	-39	-	dBm

5-8. Current Consumption Current consumption of radio section

5-8-1. Current consumption of radio section

Ta=25±2°C

Description	Symbol	Typ.	Max.	Unit
TX current @ P _{OUT} = +4 dBm	I _{TX,+4dBm}	10.9	16.0	mA
TX current @ P _{OUT} = 0 dBm	I _{TX,0dBm}	8.0	12.0	mA
TX current @ P _{OUT} = -4 dBm	I _{TX,-4dBm}	7.3	11.0	mA
TX current @ P _{OUT} = -8 dBm	I _{TX,-8dBm}	6.6	10.0	mA
TX current @ P _{OUT} = -12 dBm	I _{TX,-12dBm}	6.3	9.5	mA
TX current @ P _{OUT} = -16 dBm	I _{TX,-16dBm}	6.1	9.0	mA
RX current	I _{RX}	11.2	16.3	mA
Deep Sleep current	I _{SLEEP}	5.5		uA

5-8-2. Average current (reference value)

Ta=25±2°C

Description	Symbol	Typ.	Max.	Unit
All Sensors & BLE Advertisement		450		uA
BLE Advertisement		20		uA
Temperature, Humidity, Barometric Pressure		45		uA
Illuminance		30		uA
Sound level		320		uA
3-axis Acceleration		35		uA

Note: Average current value when sensor data acquisition and advertisement interval is set to 1 second.

5-9. Ssensor specification

This product is integrated with

- Environmental sensor (Temperature, Humidity, Barometric pressure)
- Illuminance sensor
- Sound level
- 3-axis acceleration sensor

The specifications of each sensor are shown in the next section. However, the characteristics will change depending on the usage and environment, so please refer to them as reference values. FCL Components does not guarantee the characteristics.

5-9-1. Temperature sensor

Items	Symbol	Min	Typ	Max	Unit
Full-Scale Range		-40		85	°C
Absolute accuracy temperature	$A_{T,25}$		±0.5		°C
	$A_{T,full}$		±1.0		°C
Output resolution	R_T		0.01		°C

5-9-2. Humidity sensor

Items	Symbol	Min	Typ	Max	Unit
Full-Scale Range		0		100	%RH
Absolute accuracy tolerance	A_H 25°C, 20 to 80%RH		±3.0		%RH
Hysteresis	H_H		±1.0		%RH
Output resolution	R_T		0.01		%RH

5-9-3. Barometric pressure sensor

Items	Symbol	Min	Typ	Max	Unit
Full-Scale Range		300		1,100	hPa
Absolute accuracy tolerance	$A_{P,full}$ 0 to 65°C, 300 to 1000hPA		±1.0		hPa
Output resolution	R_T		0.01		hPa

5-9-4. Illuminance sensor

Items	Symbol	Min	Typ	Max	Unit
Full-Scale Range		0		10,000	Lx
Output resolution			1		Lx

5-9-5. **Sound level sensor**

Items	Symbol	Min	Typ	Max	Unit
Full-Scale Range		0		90	dB SPL
Output resolution	R _T		1		dB SPL

The measured value of the Sound level sensor is only for reference because it is affected by the installation configuration for the sound source and the surrounding environment (indoor, outdoor, placement of shielding, etc.).

Check the characteristics in your environment before using.

5-9-6. **3-axis acceleration sensor**

Items	Symbol	Min	Typ	Max	Unit
ACCELEROMETER SENSITIVITY					
Full-Scale Range		0		±16	G
Output resolution			0.001		G

Note: Refer to the document of “*Bluetooth* low energy enabled Beacon FDCB s132v6 Firmware Specification”.

Axis direction

The direction of the axis is as shown below.

6. Interface specifications

6-1. Software Interface

Refer to the document of “*Bluetooth* low energy enabled Sensor Beacon FDCB s132v6 Firmware Specification”.

6-2. Hardware Interface

Figure 6-1: Hardware Interface

7. Function Specification

7-1. Operation Mode

This product has two types of operation modes as shown in the table below, and the modes can be switched by operating the slide switch and button at startup.

The behavior of MODE_1 and MODE_2 is configurable.

Operation Mode	Description
MODE_1	The mode assumed to be used for normal operation.
MODE_2	The mode assumed to be used for changing settings.
MODE_3 (Recovery Mode)	All configurations are deleted and restored with "Firmware Default Setting".

Each operation setting can be changed.

Setting changes during operation are performed over the air. More specifically, it is possible to change the settings by connecting to the central device equipped with our own commands and issuing commands.

Note: Refer to the document of "Bluetooth low energy enabled Beacon FDCB s132v6 Firmware Specification".

7-1-1. Mode 1 (Normal Operation)

Operating Instructions	Slide Switch	Push Button	LED
Turn on this product with a slide switch while not pushing a button.	OFF	OFF	lighting-off
	ON		Blinking (1 second)
			lighting-off

Figure 7-1: Mode 1

7-1-1-1. Behavior of Mode 1

After the slide switch is turned on, the LED indicator flashes for 2 seconds and then goes off. This LED blinking behavior can't be changed.

On start-up, this product starts advertising operation by AUTO_BROADCAST function using the setting of WRITE_AB_NV Command.

In this mode, it is not possible to connect with a Central device.

Note: Refer to the document of "Bluetooth low energy enabled Beacon FDCB s132v6 Firmware Specification".

7-1-2. Mode 2 (Remote Controllable Mode)

Operating Instructions	Slide Switch	Push Button	LED
Turn on this product with a slide switch while pushing a button. Then LED will light up in 1 second.	OFF	ON	lighting-off
	ON		lighting-off (1 second)
Stop pushing a button within 5 seconds, after LED lights up.			lighting-up
		lighting-up (within 5 seconds)	
		OFF	lighting-off

Figure 7-2: Mode 2

7-1-2-1. Behavior of Mode 2

After the startup is completed, advertise with the AUTO_SLAVE function according to the setting of the WRITE_AS_NV command. Operates as a connectable peripheral according to the settings of the first to third parameters of the WRITE_AS_PARAM2_NV command, and advertises data generated by this product. Connection with the central device (including connection in remote command mode) is possible.

Note: Refer to the document of "Bluetooth low energy enabled Beacon FDCB s132v6 Firmware Specification".

7-1-3. Mode 3 (Method of Starting on Recovery Mode)

Operating Instructions	Slide Switch	Push Button	LED
Turn on this product with a slide switch while pushing a button. Then LED will light up in 1 second.	OFF	ON	lighting-off
	ON		lighting-off (1 second) lighting-up
Continues to push a button more than 15 seconds. Stop pushing a button within 5 seconds, after LED starts blinking. Then all configuration will be initialized and automatically re-boots.			lighting-up (15 seconds)
			blinking (within 5seconds)
			-
		OFF	

Figure 7-3: Mode 3

7-1-3-1. Behavior of Mode 3

Recovery mode is the function that intend to forcibly recover this product to the default configuration if this product has been uncontrollable by incorrect setting.

Note: All data including advertising data are initialized. Please use this function carefully.
Please refer to section 8.

7-1-4 Function of push button and LED indicator

The push button is used to switch the operation mode (Mode 1, Mode 2, mode 3: recovery mode) at startup.

The LED indicator shows the status when switching the operation mode.

8. The Firmware initial default setting and factory default setting

This firmware has the initial setting described in the following table.

* All setting can be initialized to this setting by using Mode 3 (Section 7-1-3).

*This product is shipped initializing to firmware initial setting. Unless otherwise stated, any settings are not overwritten as factory default setting.

FW: fdc_b_s132v6-0_v1.00

Command Name	Parameter Name	Value	Explanatory Remarks
WRITE_AS_NV	AS_MODE_1	0 (Disable)	Used the setting by WRITE_AS_PARAM2_NV command.

Note: Refer to the document of “Bluetooth low energy enabled Beacon FDCB s132v6 Firmware Specification”.

Note: These initial settings are subject to change due to firmware versions.

9. Mechanical Characteristics

9-1. Appearance and Dimensions

Unit [mm]

9-2. Stamping label specification

(1) Product serial number: 109099

(2) Lot number: 0200

Serial number: 00~

Month of manufacture: 1-9, X, Y, Z

Year of manufacture: One digit in A.D.

(3) Product version number: XX

Product version number: AA~ mass production
S1~ Sample product

(4) BD address: 12 digits

(5) QR code: Internal data (BD address 12 digits)

(6) Product serial number + identifier: FWM8BLZ07 + A

10. Storage Conditions

- Do not store this Beacon Unit in the environments exposed to shock or vibration. It may result in damage, malfunction, or deterioration of quality.
- Do not throw or drop cartons containing the Beacon Unit during transportation. It may result in damage, malfunction, or deterioration of quality.

11. Product warranty period

- The warranty period of this product is 18 months after the product is shipped from our company.
- We can not provide any warranty for the operation of this product in all vibrating condition. Please check in your own environment before use.

12. Mounting / Replacement method of battery

12-1. Use of lithium battery “CR2450”.

Please use a battery with a shape of minus electrode convex part height of 0.9 mm or more and a diameter of ϕ 23 mm or less so that clearance (gap) can be obtained between the holder and the battery.

Improper battery shape may damage the beacon holder.

12-2. Removal of a battery cover lid

Slide the battery cover lid in the direction of arrowed line, until the cover is unlocked from claws. Lift the lid from the tail end and remove.

12-3. Mounting of a battery

Insert the battery slantingly in the battery compartment with the (+) sign facing up. While inserting the battery, push it gently

Battery is held firmly by the rib of battery compartment.

The state when battery is mounted

12-4. Installation of a battery cover lid

Parallel the tail end to a store part of Insert the pawls of battery cover lid into the square hole of battery compartment slantingly.Parallel the tail end to battery compartment and push the battery cover lid to lock.lid.

12-5. Replace battery

Remove the battery case lid. (Refer to a procedure of 12-1)

Push the battery gently from the groove by finger(or object such as toothpick) in the direction of arrowed line.

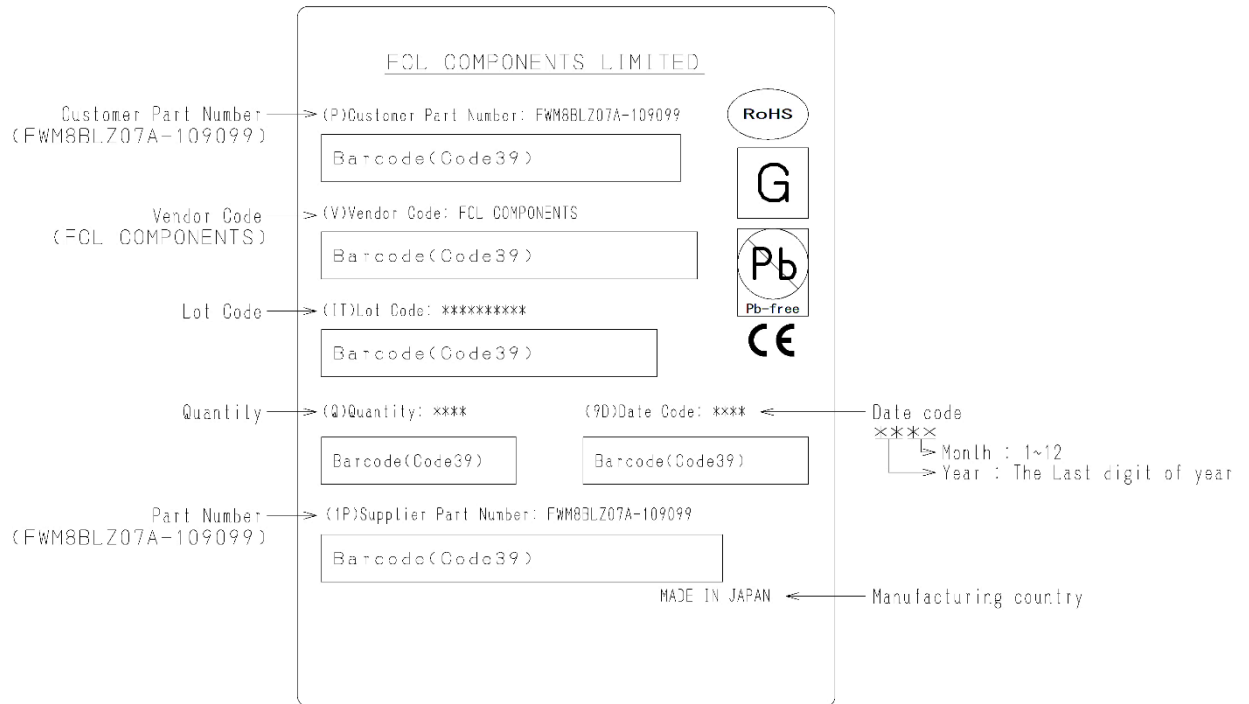

Lift the battery up in the direction of arrowed line, and remove it from the compartment.

Replace with a new battery.

13. Packing Specification in shipment

13-1. Reel label

13-2. Shipment Packing

13-2-1. Tray packing

Each tray holds 25 products and packs up to 7 tiers (total 175). Use an empty tray at the top as a lid and converge with tape.

If the product storage tray is less than 7 trays, fill the gap with cushioning material.

Tray dimensions

Tray packing

Tray convergence

13-2-2. Shipping package

14. Compliance Statement

Note to users in the United States of America

Caution:

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Declaration of Conformity

This device complies with part 15 of FCC Rules.

Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

Note to users in the United States of America and Canada

Note to users

It is strictly forbidden to use antenna except designated.

This equipment must not be co-located or operated in conjunction with any other antenna or transmitter.

This equipment complies with FCC/IC radiation exposure limits set forth for an uncontrolled environment and meets the FCC radio frequency (RF) Exposure Guidelines and RSS-102 of the IC radio frequency (RF) Exposure rules. This equipment has very low levels of RF energy that is deemed to comply without testing of specific absorption rate(SAR).

Note to users in Canada

Cet équipement est conforme aux limites d'exposition aux rayonnements énoncées pour un environnement non contrôlé et respecte les règles d'exposition aux fréquences radioélectriques (RF) CNR-102 de l'IC. Cet équipement émet une énergie RF très faible qui est considérée conforme sans évaluation de l'exposition maximale autorisée.

Note to users in Canada

This device complies with Industry Canada's licence-exempt RSSs.

Operation is subject to the following two conditions:

- (1) This device may not cause interference; and
- (2) This device must accept any interference, including interference that may cause undesired operation of the device.

Remarque concernant les utilisateurs au Canada

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes :

- (1) l'appareil ne doit pas produire de brouillage, et
- (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

European Community Compliance Statement

Note:

Hereby, FCL Components Limited, declares that this FWM8BLZ07 is in compliance with the essential requirements and other relevant provisions of Directive 2014/53/EU.
